

Remarks

Changes to the drawings:

There has been no structural changes to Figure 1. The amended Figure 1 has included the following new labels,

- (1) 35 points to an enclosure.
- (2) 75 points to an opening.
- (3) 95 points to the interior of the chamber 10.

The following labels, which also appear in Fig. 2, are inserted into Fig. 1,

- (4) 420: a crawl path.
- (5) 480: a distal end of the crawl path 420.

A thin layer of oily material 740, which also appears in Fig. 4, is inserted into Fig. 2.

Changes to the specification:

The amended paragraphs, from Paragraph [0019] to Paragraph [0020] submitted in the previous Amendment J, have included detail description to better describe the structural elements of Fig. 1.

The words “bottomless impenetrable enclosure” in line 3 of the amended Paragraph [0020], describe the enclosure formed by the bunch 30. The function of this enclosure is similar to the bottomless enclosure of Fig. 4. The word “bottomless” first appears in lines 2-3, Paragraph [0038]. The word “impenetrable” is supported by the lines 3-4, Paragraph [0033].

Species 1, pointing to Fig. 1, is the elected species for the proposed amended independent claims 60, 71 and 84.

The applicant appreciates the allowances granted by the Examiner in the previous Office Action. The applicant requests an entry of the amendments, and consideration of the amended claims and amended drawings submitted herewith.
